

## The BJSM Global Research Grant Program

Sport and Exercise Medicine (SEM) is a growing multidisciplinary field. However, SEM as a discipline is still developing in marginalised communities\*, which may lack resources such as trained SEM personnel, necessary funding, and institutional support to implement robust clinical programs or conduct research. Funding SEM research may also not be a high priority among the other more immediate concerns experienced by resource-limited communities. In such environments, persons of colour, Indigenous communities, women, youth, those with disabilities, those who are displaced, those from the LGBTQIA+ communities, and those with intersecting social identities may be further marginalised and bear the brunt of scarce resources.

Therefore, to drive global equity in SEM and foster diverse and inclusive research and data, it is critical to provide funding opportunities for SEM researchers from marginalised groups to conduct research relevant to SEM in marginalised communities.

\*Marginalised communities include, but are not limited to, low- and middle-income countries (LMICs); Black, Indigenous, and Persons of Colour (BIPOC); women; youth; people with disabilities; LGBTQIA+; those in conflict zones; and migrant, refugee, and internally displaced communities.

### **Purpose of the grants**

The purpose of these grants is to facilitate and enhance SEM-oriented research on the health and welfare of marginalised communities by researchers from marginalised groups. The award also provides recipients with opportunities to be mentored by fellow international SEM researchers through the BJSM Global Mentoring Program.

### **Number and value of awards**

Nine (9) grants each worth £2,000 will be awarded. The grant funds are provided to facilitate the success and completion of the project and may be used for research activities and/or living expenses by the recipient.

This year we are grateful to the following member societies, the *Australasian College of Sport and Exercise Physicians (ACSEP)*, the *American Medical Society for Sports Medicine (AMSSM)*, the *Canadian Academy of Sport and Exercise Medicine (CASEM)*, and the *South African Sports Medicine Association (SASMA)* for their support of this program and sponsorship of additional grants and opportunities for SEM researchers.

### **Term**

The term of the award is one year. Previous recipients may reapply but to be competitive must demonstrate progress in their research from a prior award and explain how more funding will build upon work already completed.

## Eligibility criteria

This award is given to researchers from marginalised groups conducting research relevant to SEM in marginalised communities. The applicant should be the principal or co-principal investigator of the study.

## Selection criteria

- i. Novelty of the research project to SEM and equity deserving groups.
- ii. Appropriateness of the study design and scientific rigor of the research project.
- iii. Value and clinical relevance of the research project to marginalised communities.
- iv. Feasibility of the proposed research project.
- v. Quality of the application.

## Application process

Applications should consist of a cover letter and a grant proposal.

Cover letters are limited to one (1) page and should explain the background of the applicant and the context of the research relative to marginalised communities. Additionally, applicants who have career breaks for childcare, care giving, health/wellbeing, career transition, or similar circumstances, should state this in the cover letter.

The grant proposal is limited to three (3) pages (single spaced, 12-point font, 1" margins) and should include the following sections:

- Title of study
- Name and institutional affiliation (if applicable) of the principal investigator/applicant
- Background and rationale of the study (approx. ½ to ¾ page)
- Objective(s) (approx. 3 – 4 lines)
- Hypothesis (approx. 3 – 4 lines)
- Study design and methodology (approx. ¾ to 1 page)
- Significance and expected clinical, research, or policy impact (approx. ¼ to ½ page)
- Timeline of when the research will commence and the expected date of completion (approx. 3 – 4 lines)
- Budget and justification of how study funding will be allocated (approx. 4 – 8 lines)
- Qualifications of the research team and applicant (approx. 4 – 5 lines)

**Applications and any questions about the BJSM Global Research Grant Program should be sent to:**

[bjsmresearchgrants@bmj.com](mailto:bjsmresearchgrants@bmj.com)

The deadline for applications is: **19 August 2024** (11:59pm, GMT)

All applicants will be notified of the final decisions by: **15 October 2024**
