

Editorial

In July 1963 the Association co-operated with the Physical Education Association in the production of the first Sports Medicine Issue of "Physical Education", the publication of which represents a landmark in the progress of Sports Medicine in this country.

Now for the first time we are attempting to produce regularly a periodical devoted in its entirety to the interests of our Association which will come to serve as its official organ.

Initially, of course, this Bulletin will be limited both as to content and format, but given a measure of interest and co-operation on the part of its readers there seems no reason why it should not soon grow up to take its place in the forefront of the literature devoted to sports medicine.

Members of the British Association of Sport and Medicine, for whom this Bulletin is specifically prepared, are invited to comment and criticise it, and to submit suggestions and contributions, bearing in mind that this Bulletin exists for its readers, and not vice versa.

Abstracts of Papers presented at the joint Meeting of the British Association of Sport and Medicine with the Fitness and Training Section of the Ergonomics Research Society held at the London School of Hygiene and Tropical Medicine on October 19th, 1963.
