

Nomeq announce CYBEX II Isokinetic Exercise Equipment

- Objective and quantified information on muscle strengths and range of movement, for all major body joints. (Ankle, knee, hip, shoulder, elbow, wrist).
- Fixed speeds of movement from isometric to walking and running speeds for specificity of speed of exercise for every major body joint.
- Variable resistance which automatically accommodates to your patients capability in pain, fatigue and during biomechanical leverage changes.
- Over 300 unbiased publications world-wide support the values of CYBEX Isokinetic equipment in human performance research, physical rehabilitation, sports medicine and training.
- Isokinetic exercise is the safest and most efficient way to work a muscle to full capacity at every point in the range of movement.

NOMEQ
