

The New CYBEX® 340

Extremity Testing and Rehabilitation System

Real-time torque display screen

Exercise biofeedback screen

The Cybex 340 offers a new standard in Isokinetic Technology. The heart of the 340 is a powerful computer which allows patient data storage and quick computerised interpretation of all test results.

The Cybex 340 can be used for specific joint testing and or general rehabilitation. There are eighteen test and exercise patterns each with a standardised format or individual patient protocols can be programmed.

The test results are stored in both graphical and numerical form allowing quick comparisons between either bilateral tests or progress reports on one joint. All test data can also be printed in colour.

This computerised update to Cybex's already proven accuracy and reliability combines to offer safety, versatility and ease of operation for both therapist and patient.

Announcing a lavishly-illustrated guide to one of the fastest growing areas of modern health care

THE OLYMPIC BOOK OF SPORTS MEDICINE

Edited by Albert Dirix, Howard G. Knuttgen and Kurt Tittel

- *covers the special issues of young and old, fit and disabled*
- *fully illustrated with colour photographs and diagrams*

THE International Olympic Committee, International Federation of Sports Medicine and Blackwell Scientific Publications have collaborated to produce a full colour, international coverage of the whole of sports medicine. Up-to-date information is presented on both the basic science and the practical considerations of injury prevention and treatment, methods of conditioning, assessment of fitness, environmental factors, exercise and disease, and exercise in rehabilitation.

1988. 704 pages, 234 illustrations. **£39.50** 0 632 01963 8
