British Journal of **sports** **medicine**

Notes for Authors

Scope

The *British Journal of Sports Medicine* covers all aspects of sports medicine and science – the management of sports injuries; all clinical aspects of exercise, health and sport: exercise physiology and biophysical investigation of sports performance; sports psychology; physiotherapy and rehabilitation in sport; and medical and scientific support of the sports coach.

Types of Paper

Original papers (not normally over 3000 words, full length accounts of original research)

Review articles (up to 4000 words, providing concise in-depth reviews of traditional and new areas in sports medicine)

Case reports (up to 1000 words, describing clinical case histories with a message).

Refereeing

All contributions are studied by referees whose names are not normally disclosed to authors. On acceptance for publication papers are subject to editorial amendment. If rejected, papers and illustrations will not be returned. Authors are solely responsible for the factual accuracy of their papers.

Manuscripts

Authors are urged to write as concisely as possible. Four copies should be submitted, typed on only one side of the paper (quarto or A4) in double spacing with a margin of 30 mm at the top and bottom and on both sides. Papers should be arranged in the following order of presentation: title of paper; names and qualifications of the authors; address of the place at which the work was carried out; an abstract of the paper (100–200 words in length); 4–6 keywords; the text; acknowledgements (if any); references; tables; abbreviated title for use as a running headline; captions to figures (on separate sheet of paper).

For details of submission of the final revised version of the contribution on disk, please consult the Guidelines for Disk Submission, *British Journal of Sports Medicine*, volume 28, number 1, pp. 71–72, or contact Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK.

Illustrations

Drawings and graphs should be on heavy white paper/card or blue-lined coordinate paper using black ink. Label axes appropriately and clearly. Please use a selection of the following symbols: +, ×, □, ○, △, ▽, ■, ●, ▲, ▼. Photographs should be of fine quality, large glossy prints suitable for reproduction and the top should be indicated. Negatives, transparencies or X-ray films should not be supplied, any such material should be submitted in the form of photographic prints. Authors are asked where possible to draw diagrams to one of the following widths, including lettering, 168 mm, 354 mm. During photographic reproduction, the diagrams are reduced to ½ their size. The maximum depth at drawn size is 500 mm. Authors are asked to use the minimum amount of descriptive matter on graphs and drawings but rather to refer to curves, points etc. by symbols and place the descriptive matter in the caption. Three copies of each illustration are required and these should be numbered in a consecutive series of figures using Arabic numerals. Legends should be typed in double spacing on a separate page but grouped together. Each figure should be identified on the back – figure number and name of the author. Figures which have been published elsewhere should be accompanied by a form of permission to reproduce, obtained from the original publisher.

References

These should be indicated in the text by superscript Arabic numerals which run consecutively through the paper. The references should be grouped in a section at the end of the text in numerical order and should take the form: author's names and initials; title of article; abbreviated journal title; year of publication; volume number; page numbers. If in doubt authors should always write the journal title in full. References to a book should take the form: author's surname, followed by initials; title of book in single quotes; editors (if any); volume number/edition (if any); name of publishers; place of publication; year of publication and page numbers. Where a paper is cited more than once in the text, the same superior numeral should be used on each occasion. e.g.

- 21 Sperryn PN. *Sport and Medicine*. London: Butterworths, 1983.
- 22 Ellitsgaard N and Warburg F. Movements causing ankle fractures in parachuting. *Br J Sports Med* 1989; 23: 27–9.

Tables

Tables should be typed on separate sheets together with a suitable caption at the top of each table. Column headings should be kept as brief as possible, and indicate units of measurement in parenthesis. Tables should not duplicate information summarized in illustrations.

Footnotes

Footnotes should be used sparingly. They should be indicated by asterisks (*), daggers (†), and double daggers (‡), in that order. In the manuscript, a footnote should be placed at the bottom of the page on which it is referred to and separated from the main text by a horizontal line above the footnote. Footnotes to tables should be placed at the bottom of the table to which they refer.

Drugs, Abbreviations and Units

Drugs should be referred to by their approved, not proprietary, names, and the source of any new or experimental materials should be given. If abbreviations are used these should be given in full the first time they are mentioned in the text. Scientific measurements should be given in SI units, but blood pressure should continue to be expressed in mmHg.

Proofs

Authors are responsible for ensuring that all manuscripts (whether original or revised) are accurately typed before final submission. Two sets of proofs will be sent to the author before publication, one of which should be returned promptly (by Express Air Mail if outside UK). The publishers reserve the right to charge for any changes made at the proof stage (other than printers errors) since the insertion or deletion of a single word may necessitate the resetting of whole paragraphs.

Submission

Four copies of the complete manuscript and illustrations should be sent to Dr P. N. Sperryn, The Editor, British Journal of Sports Medicine, Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK.

All material submitted for publication is assumed to be submitted exclusively to the British Journal of Sports Medicine. All contributing authors must sign a letter of consent to publication. The editor retains the customary right to style and if necessary shorten material accepted for publication. Manuscripts will be acknowledged on receipt. Authors should keep one copy of their manuscript for reference. Authors should include their names and initials and not more than one degree each.
