CORRECTION

doi: 10.1136/bjsm.2006.033480corr1

On pages 652 and 653 the keys for figures 3 and 4 are incorrect. The keys should be colour-coded grey for ST and black for PT. Please see the corrected figures 3 and 4 included here. The journal apologises for this error.

Figure 3 Percentage changes in bone mineral density (BMD), measured by dual x-ray absorptiometry, between baseline and year 2 at (A) the lumbar spine (L1–L4), (B) the proximal femur and (C) the forearm in the strength training (ST) and power training (PT) group. Values are mean (SD). Significant between-group differences are marked with asterisks.

Figure 4 Pain frequency (A) and pain intensity (B) at baseline and year 2 at the lumbar spine and big joints in the strength training (ST) and power training (PT) group. Values are mean (SD). Significant within-group changes are marked with an asterisk.
