Warm up

845 Knowledge and global health: reducing the burden of non-communicable diseases using physical activity
S Aspinall, A Munro

Editorials

847 Better than what? Comparisons in low back pain clinical trials
M J Travers, M K Bagg, W Gibson, K O'Sullivan, T S Palsson

848 Should exercise be considered as an alternative to drug treatment in patients with low-risk mild hypertension?
J P Sheppard

849 Exercise measures up to medication as antihypertensive therapy: its value has long been underestimated
L S Pescatello

852 Sitting behaviour and physical activity: two sides of the same cardiovascular health coin?
E Stamatakis, J M R Gill

853 Importance of both increasing physical activity and reducing sitting time
H Arem, C E Matthews

854 Out-running 'bad' diets: beyond weight loss there is clear evidence of the benefits of physical activity
S M Phillips, M J Joyner

Consensus statement

856 Copenhagen Consensus statement 2019: physical activity and ageing
J Bangsbo, J Blackwell, C-J Boraxbekk, P Caserotti, F Dela, A B Evans, A P Jespersen, L Glemann, A F Kramer, J Lundbye-Jensen, E L Mortensen, A J Lassen, A J Gow, S D R Harridge, Y Hellsten, M Kjaer, U M Kujala, R E Rhodes, E C J Pike, T Skinner, T Skovgaard, J Troelsen, E Tulle, M A Tully, J G Z van Uffelen, J Viña

Systematic reviews

859 How does exercise treatment compare with antihypertensive medications? A network meta-analysis of 391 randomised controlled trials assessing exercise and medication effects on systolic blood pressure
H Naci, M Salcher-Konrad, S Dias, M R Blum, S A Sahoo, D Numan, J P A Ioannidis

870 Cycling is associated with a lower incidence of cardiovascular diseases and death: Part 1 – systematic review of cohort studies with meta-analysis
S Nordengen, L B Andersen, A K Solbraa, A Riiser

879 Cycling and cardiovascular disease risk factors including body composition, blood lipids and cardiorespiratory fitness analysed as continuous variables: Part 2—systematic review with meta-analysis
S Nordengen, L B Andersen, A K Solbraa, A Riiser

This article has been chosen by the Editor to be of special interest or importance and is freely available online.

This article has been made freely available online under the BMJ Journals open access scheme. See <http://bjsm.bmj.com/site/about/guidelines.xhtml#open>

This journal is a member of and subscribes to the principles of the Committee on Publication Ethics www.publicationethics.org.uk

The online version of this article contains multiple choice questions hosted on BMJ Learning.

- 886** Do the associations of sedentary behaviour with cardiovascular disease mortality and cancer mortality differ by physical activity level? A systematic review and harmonised meta-analysis of data from 850 060 participants
U Ekelund, W J Brown, J Steene-Johannessen, M W Fagerland, N Owen, K E Powell, A E Bauman, I-M Lee

Original article

- 895** Increased leisure-time physical activity associated with lower onset of diabetes in 44 828 adults with impaired fasting glucose: a population-based prospective cohort study
X Q Lao, H-B Deng, X Liu, T-C Chan, Z Zhang, L Chang, E-K Yeoh, T Tam, M C S Wong, G N Thomas

Infographics

- 901** Infographic. What interventions can improve quality of life or psychosocial factors of individuals with knee osteoarthritis? A systematic review with meta-analysis of primary outcomes from randomised controlled trials
R V Briani, A S Ferreira, M F Pazzinato, E Pappas, D De Oliveira Silva, F M de Azevedo

- 903** Infographic. Walking on sunshine: scoping review of the evidence for walking and mental health
P Kelly, C Williamson, R Hunter, A G Niven, N Mutrie, J Richards

Bright spots

- 905** Bright sports, physical activity investments that work: implementing brain breaks in Malaysian primary schools
G Kuan, H Rizal, M S Hajar, M-K Chin, M M C Mok

Education reviews

- 907** Musculoskeletal pain and exercise—challenging existing paradigms and introducing new
B E Smith, P Hendrick, M Bateman, S Holden, C Littlewood, T O Smith, P Logan

Letter in response to

- 914** STOPS trial versus Costa *et al*: a more accurate analysis
J J Ford, A J Hahne, L D Surkitt, A Y P Chan, M C Richards, S L Slater, T Pizzari, M Davidson, N F Taylor
