Volume 57 Issue 20 | BJSM October 2023

Warm up
1281 Exercise as medicine… in more ways than one!
O B A Owwoye

Editorials
1282 Return to play after myocarditis: time to abandon the one-size-fits-all approach?
G Claessen, A La Gerche, R De Bosaer

1284 We should oppose policies based on false science or distorted evidence with the potential to cause harm
L Olewinski

1285 Pregnancy and physical activity: facilitating change
K R Marino, G Donnelly, I S Moore, M De Vivo, D Vishnubala

Original research
1287 Quadriceps or hip exercises for patellofemoral pain? A randomised controlled equivalence trial
R Hansen, C Brushøj, M S Raittloff, S P Magaussus, M Henriksen

1295 Effects of a 16-week home-based exercise training programme on health-related quality of life, functional capacity, and persistent symptoms in survivors of severe/critical COVID-19: a randomised controlled trial

1304 Performance and symmetry measures during vertical jump testing at return to sport after ACL reconstruction
R Kasufi, V Sideris, E King, R Bahr, R Whiteley

1311 The VISA-A (sedentary) should be used for sedentary patients with Achilles tendinopathy: a modified version of the VISA-A developed and evaluated in accordance with the COSMIN checklist
R Norris, J L Cooke, J E Caida, T Maddox, J Raju, S O’Neill

Reviews
1317 Exercise training and resting blood pressure: a large-scale pairwise and network meta-analysis of randomised controlled trials

1327 Effect of resistance exercise dose components for tendinopathy management: a systematic review with meta-analysis

Infographic
1335 Infographic. Exercise training and resting blood pressure: a large-scale pairwise and network meta-analysis of randomised controlled trials

PhD Academy Award
1337 Effects of low-load and high-load resistance training combined with aerobic training in patients with coronary artery disease: a dose-dependent randomised, controlled trial (PhD Academy Award)
T Kambit

Viewpoint
1338 The lithium content of medicinal preparations: a systematic review
G G Plowman, J R Ward, S J Naremore, M J M Goodall, P E Morrell, D T Dora

1342 The influence of local leg sensation on gait and balance in people with Charcot-Marie-Tooth disease
R Trotter, J M O’Driscoll, B E Keefe, S D Wales, S M Tank, C E Franklin, N J Cooper

1345 Exercise based cardiac rehabilitation in patients with heart failure: a systematic review and meta-analysis of cluster-randomised trials
A T Austin, A McDermott, A Mawhinney, W A Paterson, J F Gooch, R G Clark

1348 Exercise-based cardiac rehabilitation in chronic heart failure: a systematic review of randomised controlled trials
A T Austin, A McDermott, A Mawhinney, W A Paterson, J F Gooch, R G Clark

1356 The influence of feedback on movement performance and perceived exertion during exercise training: a meta-analysis
D Palyha, D M Frank, S J Pate, N A MacLellan, S A Gabbett

1358 Effects of an exercise intervention with concurrent balance training on gait and balance in patients with Parkinson’s disease
R J Fossard, D T Dora, J M O’Driscoll

1364 The impact of exercise on cognitive measures in people with Parkinson’s disease: a systematic review and meta-analysis
R D Wissow, E M Kindzierski, L S Vickers, M Fordyce, D H Ziegler, D M Frank

1369 Exercise and mental health and wellbeing: a systematic review of knowledge, attitudes and implementation
K K Järvelä, J A Jäntti, E T Wallin, J K Järvelä

1371 Effects of home-based exercise on general health-related quality of life in people with aortic stenosis
L S Vickers, R D Wissow, D H Ziegler, D M Frank

1372 Perceived enjoyment of exercise and physical activity and risk of all-cause mortality among older people: a systematic review and meta-analysis
C C Del-Buono, E McMillan, M Merioz, M Aroma, L D’Avanzo, P O’Doherty, G Eckert, D M Frank

1373 Exercise-based cardiac rehabilitation in liver cirrhosis: a systematic review and meta-analysis of randomised controlled trials
A C A Bessey, A H M O’Dwyer, D J Dickerson, S J Pate, A T Austin, R J Fossard, D T Dora, J M O’Driscoll

1374 Home-based moderate-intensity exercise and low-intensity walking are effective at improving aerobic capacity, physical function, and quality of life in people with chronic heart failure: a systematic review and meta-analysis
A S Bradbury, E S Lund, J J Edwards, D T Dora, J M O’Driscoll
