

MEETINGS OF OTHER ORGANISATIONS

ASSOCIATION OF CHARTERED PHYSIOTHERAPISTS IN SPORTS MEDICINE

ANNUAL CONFERENCE AT LOUGHBOROUGH UNIVERSITY OF TECHNOLOGY, 4th – 6th July, 1975

Residential

Friday, 4th July, 1975

- 5.00 p.m. Registration
 8.30 p.m. Film Show – European Games or similar

Saturday, 5th July, 1975

Chairman – Professor J. E. Kane, MEd. Ph.D.

- 9.45 a.m. Address of Welcome – Prof. J. Kane, MEd. Ph.D.
 Ankle Injuries in Sports – Dr. T. Sargent, F.R.C.S., Orthopaedic Consultant.
 Soft Tissue Injuries – Mr. H. Willis, M.C.S.P.
 The Relative merits of supporting measures following sports injuries – Mr. A. Bonelle, M.C.S.P.
 General discussion

- 1.00 p.m. Luncheon

Chairman – Dr. Henry Robson

The Team Doctor – Dr. Peter Sperryn, M.R.C.P.
 Physiology of Exercise – Mr. D. Hill, M.C.S.P.

- 3.30 p.m. Discussion
 Tea

- 4.00 p.m. Demonstrations of Exercise Physiology Apparatus, Research techniques etc., Human Biology Department, Loughborough University of Anatomy. Physiology Laboratory, Loughborough College of Education, and – Sports Equipment Slazengers.

- 6.30 p.m. Reception
 7.30 p.m. Annual Dinner

Sunday, 6th July, 1975

Chairman – Mr. D. Chapman, M.C.S.P.

- 10.00 a.m. Sports Psychology – Prof. J. Kane, MEd. Ph.D.
 11.15 a.m. Techniques of Research – Dr. E. J. Hamley
 12.00 noon Annual General Meeting
 1.00 p.m. Luncheon

MEETING CLOSES

BRITISH ASSOCIATION OF SPORT AND MEDICINE

President: His Excellency LORD PORRITT, G.C.M.G., G.C.V.O., C.B.E., F.R.C.S.

Hon. Secretary:

39 Linkfield Road,
Mountsorrel,
Loughborough, Leics.
Phone: 053-724 3436

HONORARY TREASURER'S REPORT FOR THE YEAR 1973

There is little to be said about the year ending 31st December, 1973, from the financial viewpoint, but the figures presented, although accurate for the year in question, do not really present the Association's financial position. On the Income and Expenditure Account, subscriptions of £2,300 is short of the anticipated subscriptions due to us; 720 ordinary members at £3 should give £2,160 and 65 affiliated bodies at £5 should bring in another £325, a much needed £150 short. There were some 65 libraries or external journal subscribers, and we sold several back numbers of the journal, to bring in £156. Members should be grateful to a few members of the Executive Committee who donate any external lecture fees they might receive to help our finances. We appreciate those firms that advertise in the journal, but would be grateful if members could persuade any drug or instrument firms with whom they are in contact to give us more advertisements for publication in our journal. As we had a healthy surplus of income this year, £1,500 was transferred to Deposit Account, and brought in nearly £60 interest. Once again, subscriptions members paid for the international Journal of Sports Medicine and Physical Fitness (£64) were a long way short of the money we had to pay the publishers (£105).

On the expenditure side, we only paid for one journal, Vol. 6, Nos. 3 & 4 combined issue, which was published in December 1972 and paid for in 1973. The rest of the year, our publishing activities involved the production of the massive Proceedings of the 18th World Congress of Sports Medicine, the congress we staged at Oxford in 1970. Strenuous efforts were made to find sponsorship for this publication, but the economic situation was already worsening, and we had to bear the full production costs (nearly £3,000) ourselves, which soon abolished the £1,500 in deposit, and the relatively small balance of £930 in our current account. We also produced another issue of Vol. 7, Nos. 3 & 4 combined, and that also had to be paid for in 1974, another £600 odd. We then, of course, had to pay for the 1974 journals as well.

On the Balance Sheet, the first two items, stocks of journals in hand, and debtors — unpaid and underpaid subscriptions — make our assets look substantial, but we would much rather have the cash! The Adolphe Abrahams Memorial deposit account was boosted by the brief sojourn of money transferred from the current account that was made to "earn its living" in deposit. Towards the end of the year we received a grant from the Sports Council towards sending a delegate to the 20th World Congress of Sports Medicine in Melbourne, and this money was used a very few weeks later in 1974, to pay the air fare. A small bill for £24 was owing to the printers for the circulation of notices, although it was actually paid at the turn of the year.

To sum up 1973, we finished up with a substantial sum in the bank by the delay, due to factors outside our control, of the publication of the World Congress proceedings and other journals, and would have been even better off if everyone had paid their subscriptions when requested.

1974

Although the Annual General Meeting for the presentation of the accounts for 1974 could well be another year hence, it is felt by the Executive Committee that an interim appreciation of the situation should be made, and discussed. The income and expenditure up to the middle of September 1974 have been added up, though not submitted to the Auditors yet, and reflect the present escalation of prices which affect us as much as they affect every other organisation, in the U.K. and overseas. A summary of our income and expenditure is presented below.

PROVISIONAL INCOME & EXPENDITURE — 1974 up to mid-September

INCOME

<i>Subscriptions</i> including Library subs. for BJSM and members' subs for JSM & PF	£2306
<i>Grants</i> Sports Council, trav. exp. for 1 delegate to Europ. Sp. Med. congress — Budapest. 66% of cost	£ 91
Abbotts Laboratories; Altitude Symposium, incl. 1/3 cost of "Proceedings"	£ 503
ADD Cash in Dep. a/c	£1600
Cash in Current a/c	£ 930
	£5430
ADD <u>Income</u> <u>Expenditure</u>	£ 34
	<u>£5464</u>

EXPENDITURE

Subscriptions; FIMS, BSAD	£ 100
66% Travelling exp. Melbourne	£ 465
Budapest	£ 91
(Both paid by Sports Council grants)	
A.G.M. (Sponsored by Abbotts Ltd.) & Altitude Symposium	£ 273
<i>Admin.</i> Bank chs. & secretarial help	£ 6
Journ. Sp. Med. & Phys. Fit.	£ 290
<i>Wells & Blackwell</i> Stationery and notices	£ 9
BJSM. Vol. 7, Nos. 1/2 (Proc. World Cong)	£2803
Vol. 7, Nos. 3/4	£ 629
Vol. 8, No. 1 (Alt. symp.)	£ 598
	<u>£5464</u>

BUT!

ESTIMATED FUTURE EXPENDITURE 1974

BJSM Vol. 8, Nos. 2/3	£ 800
Vol. 8, No. 4	£ 650
Notices re A.G.M.	£ 50
	<u>£1500</u>

I am arranging with the bank for an overdraft to cover the £800 for Vol. 8, Nos. 3/4, recently distributed, and we hope the printers will not send their account for No. 4 until the new year. If we were to print the four numbers a year to which we are committed, at present costs the journal would work out at about £2,800, which is £500 more than we receive in subscriptions and an increase in postage (95 pence to send Proc. World Cong. to Australia by surface mail) and price of paper makes it unlikely that we shall pay as little as £2,800. This time next year, we shall again be insolvent, but sooner in the year having paid off the £1,500 we owe the bank and the printers. Membership and external library subscriptions are increasing slowly, but not by enough to pay for next year's publications. We also have to pay certain subscriptions, to F.I.M.S. etc., and need some money for running the Association, arranging meetings, and other essential expenditure.

The cost of running B.A.S.M. has never been analysed to any extent. To attend committee meetings, especially for those outside London, must cost each member of the Executive Committee about £100 a year, and sometimes a locum has to be paid for by the member as well. Although the Constitution of the Association authorises payment of travelling expenses to those attending committee meetings, in practice these have never been paid. Any secretarial help has usually been "lost" by using the staff of the consulting room, or by amateur efforts of self-taught typing with two fingers. Full professionalisation of our administration would be prohibitive, but it would be an advantage if some money were to be available for secretarial assistance. It is also desirable that we extend the activities of our Association, at home and also in the international field; for this, a small working capital would be a great asset.

In 1971 the subscription for ordinary members was raised from two guineas to its present three pounds. Since then, there has been a very considerable rise in the cost of paper, wages in the printing trade, and postage, but also in the incomes of doctors, teachers and therapists. Most BASM members are entitled to claim their journal as a necessary expense incurred in earning their salary or other income, and can claim tax relief. In comparison with other scientific societies of similar size and activities, our present subscriptions are ludicrously low, and the Executive Committee have concluded that our members must be made aware of the financial situation, and that, with considerable reluctance, a substantial increase in all subscriptions is a vital necessity to the survival of the Association, even if a few of our less active members feel they cannot continue their support. The alternatives are:

1. Liquidation of the Association.
2. The abandonment of the Journal, so that the BASM reverts to "a convivial gathering of medically qualified ex-athletes" as one critic once described it.
3. A limited publication, such as a biennial "News Bulletin".
4. A rise in the subscriptions for doctors, and a smaller rise for those without medical qualification, who will revert to "Associate members".
5. An increase in all subscriptions.

The new subscriptions suggested by the Executive Committee are:

	Proposed for 1975	Present 1971-74	Previous up to 1970
Ordinary members	£5.00	£3.00	£2.10
Joint members (husband & wife)	£6.00	£4.00	£2.63
Student members	£2.00	£1.00	£0.53
Affiliated organisations	£8.00	£5.00	£3.15
Brit. J. Sp. Med. "Library" subscription	{ U.K. £5.00 Overseas \$15.00 U.S.	£2.00	—

It will be realised that, at present, we are selling the Journal to libraries etc. at considerably below cost price, and are subsidising the student membership to an unreasonably high level (although we feel that we should encourage student membership even at some loss). Apart from the increase in the cost of materials and wages, the journal has been expanded considerably from its early very amateurish state, and B.A.S.M. is playing an increasing part in the practice, as well as the teaching, of sports medicine, and is likely to play a more important part in the future.

These new subscription rates shall be discussed at the Annual General Meeting on November 26th, and members will have the opportunity then of expressing their views.

H. Evans Robson

HONORARY SECRETARY'S REPORT FOR THE YEAR 1973-4

AT THE B.A.S.M. ANNUAL GENERAL MEETING,

Tuesday 26th November 1974

In starting my report, may I, as has become my custom, quote from last years report — to show how far you get in half the time required — “Your committee has explored all the ways in which we can develop sports medicine in this country at the practical and academic level. Negotiations have taken place with the Institute of Sports Medicine and we have adopted a policy of inviting the Institute to participate in all our activities and are very glad to see that body represented at today's meeting. (The Altitude Meeting). On a number of major issues in the past year it has become more obvious that there is an urgent need for one central body to coordinate the organisation of sports medical activities in this country.”

I would like to regard this day as the culmination of a year's attempt to conciliate, and draw together the various factions and bodies interested in sports medicine. In fact, as I suppose I owe an account of my three year stewardship since election, I would like to suggest that today is a significant step forward in drawing together in a process of conciliation the interests working in sports medicine.

On the purely domestic front of BASM, I have to report that the Adolphe Abrahams Trust has been finally set up as a formal trust document and is available to receive contributions, and the Adolphe Abrahams Lecturer occurs — when we can afford him — at AGMs. The Journal for the 1970 Oxford World Congress Proceedings actually happened during this past year, as predicted since 1968, and you will have noticed from the latest cover that we have taken steps to establish an Editorial Board, as yet incomplete and the point of this is to achieve a higher standard for the Journal and to secure international library recognition for the Journal — one of the positive steps we have taken to enhance the academic standing of our publication. We are well into the level of being able to reject papers rather than being grateful to print anything supplied.

In the academic field we have made arrangements for the first ever residential course to be held at Loughborough next September, which will meet the 40 hour syllabus laid down by the FIMS — the standard international course in Sports Medicine.

Our Altitude Meeting was adjudged to be successful enough to make us feel that we should advance and try and carry out one major symposium as often as possible, perhaps annually but depending on outside financial

help, and we have made arrangements for a major symposium on 19th February 1975 on “Anabolic Steroids in Sport”. Partly because of the success internationally of the Altitude Meeting publication we find that we have had already requests for participation from the major countries of Eastern and Western Europe. We are short of money for this but we have made the arrangements, and maybe Father Christmas will help us out!

On the domestic front I have to report very successful meetings at Largs, by the Scottish Area — as mentioned in the Scottish report, and I would repeat my plea to members in last year's report that you would find the investment in the fare to Largs well worth it, if you could just remove yourselves from the south once a year. The academic quality is matched only by the social quality of the occasion! The sort of thing we can never get around to arranging in the Home Counties.

We have furthered our cooperation with other professional bodies, most especially the Physiotherapists. They have shamed us by their highly efficient and professional — and enjoyable — weekend course of the Association of Chartered Physiotherapists in Sports Medicine at Lancaster and forced us to revise our policy of holding free meetings in future. The Physiotherapists have provided much of the energy behind our activities this year.

We had previously decided, partly for financial reasons, to follow a policy of aiming for a first class Journal, a few major Symposia and as much academic activity as possible on a personal level with lectures, courses and joint meetings with other bodies to be pursued vigorously. We want to act as coordinator and spreader of the gospel rather than as organiser of rather pathetic little meetings. To this end we have had lectures and joint conferences in Ireland, Scotland, England, Wales and the Isle of Man at home and the Far East and America abroad. We have returned hospitality to doctors from Australia, Singapore, Thailand, and Europe during the year some of whom have visited our clinics either by personal contact or through the British Council. Many of them want to come and see BASM and I feel that the world still does to some extent look at British medicine and its highest standards. Travellers find it worthwhile to stop in transit to see what we have to offer and we feel strongly that BASM should foster these contacts.

This is why we feel that BASM should be thoroughly

represented at all major conferences — our world shop-window. We had no less than ten home members at the World Congress in Melbourne, two at the European Congress in Budapest as formal delegates reading papers which were well received. We feel that our contacts in Eastern Europe are most important because of the wide spread of sports medicine there from which we have learnt much and also because of Eastern Europe's respect for the standards we represent in clinical medicine. We also had three delegates at conferences in India where again the warmth of their reception was most encouraging.

On the academic front the major breakthrough has been the recognition of sports medicine as a special interest subject in the new Diploma in Medical Rehabilitation. The Committee has endeavoured to ensure that all the constituent disciplines of sports medicine are well spoken for in the implications of this new development. The final aim of "Sports Medicine" is after all at its end point the production of all that is best in science and medicine to the sportsman, and we have pursued what we have felt to be the best way towards this final ideal. To this end we have encouraged training programmes especially secondments, for instance of GP's who may legitimately work in our sports clinics as part of their postgraduate seniority schemes, and in the next "Physiotherapy" journal will appear the first ever advertisement for a sports physiotherapist in the N.H.S., another practical way in which we can advance the spread of postgraduate training in our subject.

Internationally, we are following up detailed contacts with the Belgian Sports Medical Association and hope that it will be fully represented at our Anabolic Symposium as well as leading perhaps to regular joint meetings. Our entry into Europe should surely provide us with new and exciting possibilities.

And now, if I can return full circle to my introductory remarks on conciliation, we found that too many people were trying to do too many things with too few resources. On the positive side I am glad to report

that the British Olympic Association has actually set up an advisory medical committee of representatives of the governing bodies and, as of right, the representatives of BASM and I feel that this sort of liaison is very important. As an immediate effect of this has been the instituting acceptance of BOA of our plea on behalf of our own members that on future Olympic occasions the BOA would make clear distinction between State Registered Physiotherapists and Masseurs, a decision which will remove a lot of ill-feeling.

We now come to the Institute of Sports Medicine. One of the problems of professionalising our office work is that in order to obtain a grant from the Sports Council we would have to be recognised as the unchallenged governing body in our field. Where there are rival bodies apparently in conflict, problems arise. Maybe we feel that we are now able to support, with substance, a formal application to the Sports Council for recognition and grant aiding. On the question of negotiating with the Institute, we have been trying in good will since 1969 to draw together, we have been more intensively since my election in 1971, we have been trying very intensively since the middle of last year, we have been trying most incredibly intensively in the last two months. There lies tabled a firm, repeated invitation from the entire Executive Committee of the Association of Sports Medicine to the Board of Management of the Institute of Sports Medicine for a joint meeting to discuss future prospects.

That lies in the future. I would like to leave you, as I vacate my office with the thought that BASM has arrived. It has produced the goods consistently, it has aimed at the highest academic levels and has done its best — and more than most — to achieve some of them and it is pointing in the right direction. You may care to consider whether the time would be right to pursue further application to the Sports Council for recognition.

P. N. Sperry

BRITISH ASSOCIATION OF SPORT AND MEDICINE

SCOTTISH AREA

SECRETARY'S REPORT 1973-1974

I have to report an interesting year for the Area, particularly with regard to the growing recognition of the contribution we can make to sport.

The Scottish Sports Council now sends out our notices etc., with much saving to the Area on stationery and postage.

The Trampoline Association asked for our help to cover the European Championships at Meadowbank, and I am pleased to record that we benefited to the tune of £30.00. Our thanks are due to the members of the Association who gave their services voluntarily.

We covered the Soccer Tournament of The British Colleges of Education, and several of our physiotherapy members provided a service which, I am happy to report, was reimbursed by a fee to them.

We also attended the Scotland/Germany Karate Championships at Bishopbriggs Sports Centre where I was fortunate to witness the fracturing of a tibia by a kick from a bare foot!

Dr. Weston represented us at the Consultative

Committee on Swimming, and contributed usefully to their deliberations.

Radio Forth sent a circular asking if we would be prepared to contribute to their programmes. I signified our willingness, and although this was obviously a routine letter which every Tom, Dick and Harry received, it does raise an interesting point for examination.

Suggestions regarding the provision of Sports Medicine at a major sports complex were sent to the recently formed Strathclyde Park Joint Committee. It will be interesting to see the developments in this direction.

This year we have been short on local meetings. There was a weekend at Firlush Point arranged by Mr. Harris, but it was poorly attended. We hope to try again, with longer notice for members. Dr. R. Johnston has offered to provide a Sunday conference in the Southern General Hospital, and this will be arranged, possibly in the Autumn.

THE NEW EXECUTIVE COMMITTEE

The following were elected at the Annual General Meeting on November 26th 1974.

President Lord Porritt, Chairman Dr. G. G. Browning, Hon. Treasurer Dr. H. E. Robson and Hon. Secretary Dr. P. N. Sperryn.

Elected Members (four), Dr. D. Tunstall-Pedoe, MRCP, Dr. H. Thomason, Ph.D., Prof. S. Miles, M.D., Prof. J. E. Kane, Ph.D.

The following were then co-opted by the New Executive Committee.

Co-opted Members, Dr. J. G. P. Williams, FRCS, Mrs. Margaret John, MCSP. Two vacancies still unfilled.

Representative Members of Coopted Bodies. The following were invited to nominate *Representative Members*. British Olympic Association, The Sports Council and The C.C.P.R.

BRITISH ASSOCIATION OF SPORT AND MEDICINE

The following were elected by the Executive Committee on 4th October 1974.

ORDINARY MEMBERS

Proposed by:

Dr. M. M. Andrew, JP, 15 Buckstone Rd., EDINBURGH EH10 6QF	P. Weston
Mr. W. E. Bramley, MCSP, Bailrigg House, The University, LANCASTER	H. Robson

Call for Subscriptions 1975

Members and other subscribers are reminded that all subscriptions are due on JANUARY 1st, 1975, at the new subscription rates specified above. In many cases, Banker's Orders shall have to be amended, and forms for this are enclosed with this journal. It will be noted that members who have retired from employment and therefore are no longer eligible for Income Tax relief, will be able from now to remain members at a reduced subscription, but are requested to declare their eligibility to the Treasurer.

IMPORTANT NOTICE

At the Annual General Meeting of the British Association of Sport and Medicine, held on November 26th, the following subscription rates were authorised, commencing on January 1st 1975.

	From Jan. 1st 1975	Previous Rate 1971-74
Ordinary members	£5.00	£3.00
Joint members (husband & wife)	£6.00	£4.00
Student members	£2.00	£1.00
Affiliated organisations	£8.00	£5.00
Retired members	£3.00	
Brit. J. Sp. Med. "Library" subscription	U.K. £5.00 Overseas \$15.00 U.S.	£2.00

New Bankers Orders will be issued.
