OBITUARY

DR. HENRY LOUIS LENTIN, MB, BCh, BAO

It is with great regret that we heard of the death of Dr. H. L. Lentin on Saturday 30th August 1975. He died almost "on active service", having just returned home after attending his duties as Medical Officer to Leicester City Football Club during their match against Liverpool. It was soon after the War that he took up this honorary appointment, and he joined B.A.S.M. in 1958. Besides his work with Leicester City, and a busy general practice, he served in the St. John Ambulance Brigade for some forty years, and with his surgery almost next door to County Headquarters he was much in demand for all manner of extra Brigade duties.

Dr. Lentin qualified at University College, Cork, in 1934, and he came to Leicester in 1935. Throughout the War, he was largely engaged in training first aid and civil defence personnel. He also played a prominent part in the development of the Jewish community in the city and county, and his death will be a sad loss to many people. We extend our sympathy to his wife and family.
